

GS69™

Blended high strength materials

GS69 is a light to medium-weight high performance film which is ideally suited to lining crates, trays and boxes.

Like Tri-Ex, GS69 is designed specifically to protect your products from today's environment. GS69 is lightweight and because it is made from less raw material, - it costs you less. And yet, because it is much stronger than conventional film, you benefit much more!

Plus, don't forget...

For lightweight materials, Hanmere has in-line print facilities for basic designs such as company logos and printed warning notices. And, by blending polymers, we can also achieve a variety of different barrier characteristics.

And there's more...

- GS69 is easy-opening and non-blocking
- it has excellent freezing properties
- it is made from prime virgin food grade polymer
- it complies with the European Food Packaging Regulations
- it can be supplied in tear-off on-roll, boxed or flatpacked formats

GS69 can also reduce your packaging waste costs by decreasing the weight of your annual material usage.

GS69™ Colour Range
